FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS
Rome, December 1990

PREPARATION OF THIS PAPER

This directory contains information about non-governmental organizations that have some involvement with fisheries and fishing communities. Such involvement may take different forms, including human resources development, research, organization-building, provision of financial assistance, etc. The directory has been prepared at the suggestion of an informal meeting of FAO and NGO representatives regarding collaboration in artisanal fisheries development which took place in Rome from 30 June to 2 July 1986. The preparation of the document was undertaken with the assistance of the International Collective in Support of Fishworkers (ICSF), 65 rue Gretry, 1000 Brussels, Belgium, which is an international non-governmental organization.

The first issue of this directory is very incomplete, and is unbalanced with regard to its geographical coverage. Non-governmental organizations that wish to be included in the next issue of this directory are encouraged to fill in the form provided on the last page of this document and mail it to the Fishery Development Planning Service, Fishery Policy and Planning Division, Fisheries Department, Food and Agriculture Organization of the United Nations, Via delle Terme di Caracalla, 00100 Rome, Italy.

FAO Fishery Policy and Planning Division.
Directory of non-governmental organizations involved in fisheries.
FAO Fisheries Circular. No. 832. Rome, FAO. 1990.
19 p.

ABSTRACT

The Directory provides brief and concise information on some non-governmental organizations that support fisheries and fishing communities in various forms, including education and training, research, financial assistance, and organization-building.

W/U2236

The FAO Fisheries Circular is a vehicle for distribution of short or ephemeral notes, lists, etc., including provisional versions of documents to be issued later in other series.

PREFACE

This directory has been prepared at the suggestion of a small informal meeting of representatives of the FAO Fisheries Department and of non-governmental organizations regarding collaboration in artisanal fisheries development. The objective of the directory is to provide brief and concise information on non-governmental organizations that support fisheries and fishing communities in various forms, including education and training, research, financial assistance, and organization-building. It is hoped that the information provided will contribute to close collaboration between the different organizations active in the field of fisheries, particularly small-scale fisheries.

The information was compiled through the means of a questionnaire that was sent to about 110 organizations. All organizations that completed and returned the questionnaire were included in the directory. Many more organizations are known to be active in the field of fisheries, especially of small-scale fisheries. However, as a matter of policy, only those organizations are listed that explicitly or implicitly expressed their concurrence with being included in this directory.

We hope that the widespread distribution of this Fisheries Circular will contribute to achieving a better coverage in later issues.
